

## What You Can Do to Bring About A Pollution-Free Planet

Although Hydrogen fuel and vehicles are not readily available right now, they can be soon if we let the right people know that there is a demand. Our Free Enterprise system will fill a need when there is one. Here is what YOU can do to help bring about the Hydrogen Economy:

1. Visit the Websites listed under Links. There is more and more information every day about Hydrogen and other Renewable Energy Sources. You can also search Google or other search engines for additional Hydrogen information.
2. Educate Yourself and your neighbors about the benefits of Hydrogen as a fuel. See Item #1 above for references.
3. Tell Your Colleges And Public Schools about the benefits of Hydrogen and participate in helping them to develop educational programs. The youth of today will be the people who will bring about the Hydrogen Economy of tomorrow. They also have the most to lose by delay and the most to gain by a shift to Hydrogen.
4. Let Your Elected Representatives Know that you insist on cleaning up the environment by using Hydrogen as a fuel. When they know they will gain votes by supporting Hydrogen, they will support it.
5. Let Vehicle Manufacturers and Dealers know that you want to purchase Hydrogen vehicles and you know other people who do, too. The prospect of sales will get their attention.
6. Tell Power and Oil Companies that you insist on using renewable energy. If they know there is a market, they will provide the product. After all, they ARE energy companies.
7. Get Involved with **T. Boone Pickens'** (<http://www.pickensplan.com>) or **Al Gore's** (<http://www.wecansolveit.org>) efforts to directly affect change in the adoption of Renewable Energy or reverse Global Warming. Donate your time, your ideas, and your talent to this effort. We need you to help make the World a better place than we found it.
